

Candy Man

Come on ladies and gather 'round
The good sweet candy man's in town
His candy stick don't melt away
It just gets better so the ladies say

Sister thought his candy stick was bad
The very next day she took all he had
Try his candy girl friends of mine
You sure might want it for a long, long time

Instrumental chorus

A long time ago not far from here
My best friend died I shed a tear
It was the dealer's work is what we heard
'Cause now he's dead and he left no word

You and candy man's getting mighty thick
Say is you stuck on the candy man's stick
His candy stick don't melt away
It just gets better so the ladies say

Instrumental chorus

Guitar solo

Come on ladies and gather 'round

Wow the good sweet candy man's in town
Try his candy girl friends of mine
You sure might want it for a long, long time

Guitar outro
