

# How To Play The Mandrake Mechanism Game

## Make The Game Pieces

In the back of this booklet there are some 8 ½ x 11 pages and some cut-out items. The 8 ½ x 11 pages are for:

- The federal government
- A federal reserve bank
- Ordinary Bank A
- Ordinary Bank B
- Ordinary Bank C

The cut-outs are for:

- TREASURY NOTE
- FEDERAL RESERVE CHECK

## How To Play The Game

When you first grasp how The Mandrake Mechanism works, I predict you won't believe it. You might think, "Wait! Where is this money coming from? Good point! It's coming from "thin air." How could something so PHONY and so BLATENTLY CORRUPT be the basis of the entire financial system of the United States?"

Our monetary system USED TO BE based on gold. Way back then, you could buy a Colt .45 for a \$20 gold piece. You still can. The Colt now costs \$800+ but the \$20 gold piece has risen in value too.

Now, things have gotten to the point that other countries REFUSE to have our debts paid back to them in our (fake—fiat) dollars. Dollars that have the same value as Monopoly money!

---

The lesson is clear. If we had kept our currency based on precious metals (gold and silver) the “dollar” would have held it’s value.

---

Back in the days when the American dollar was literally worth its weight in gold, a rancher could sell his ranch with a hand shake. The buyer would pull up in his horse-drawn buckboard with the agreed-upon price in the form of gold.

Real estate for real money.

The seller would sign over the deed. Deal done.

Man! “Those days have gone forever—over a long time ago.”

Dan and Teri bought a house. They took a lot of time to track down all the players in their purchase. They couldn’t believe their eyes!

Here’s the way selling a house looks today.

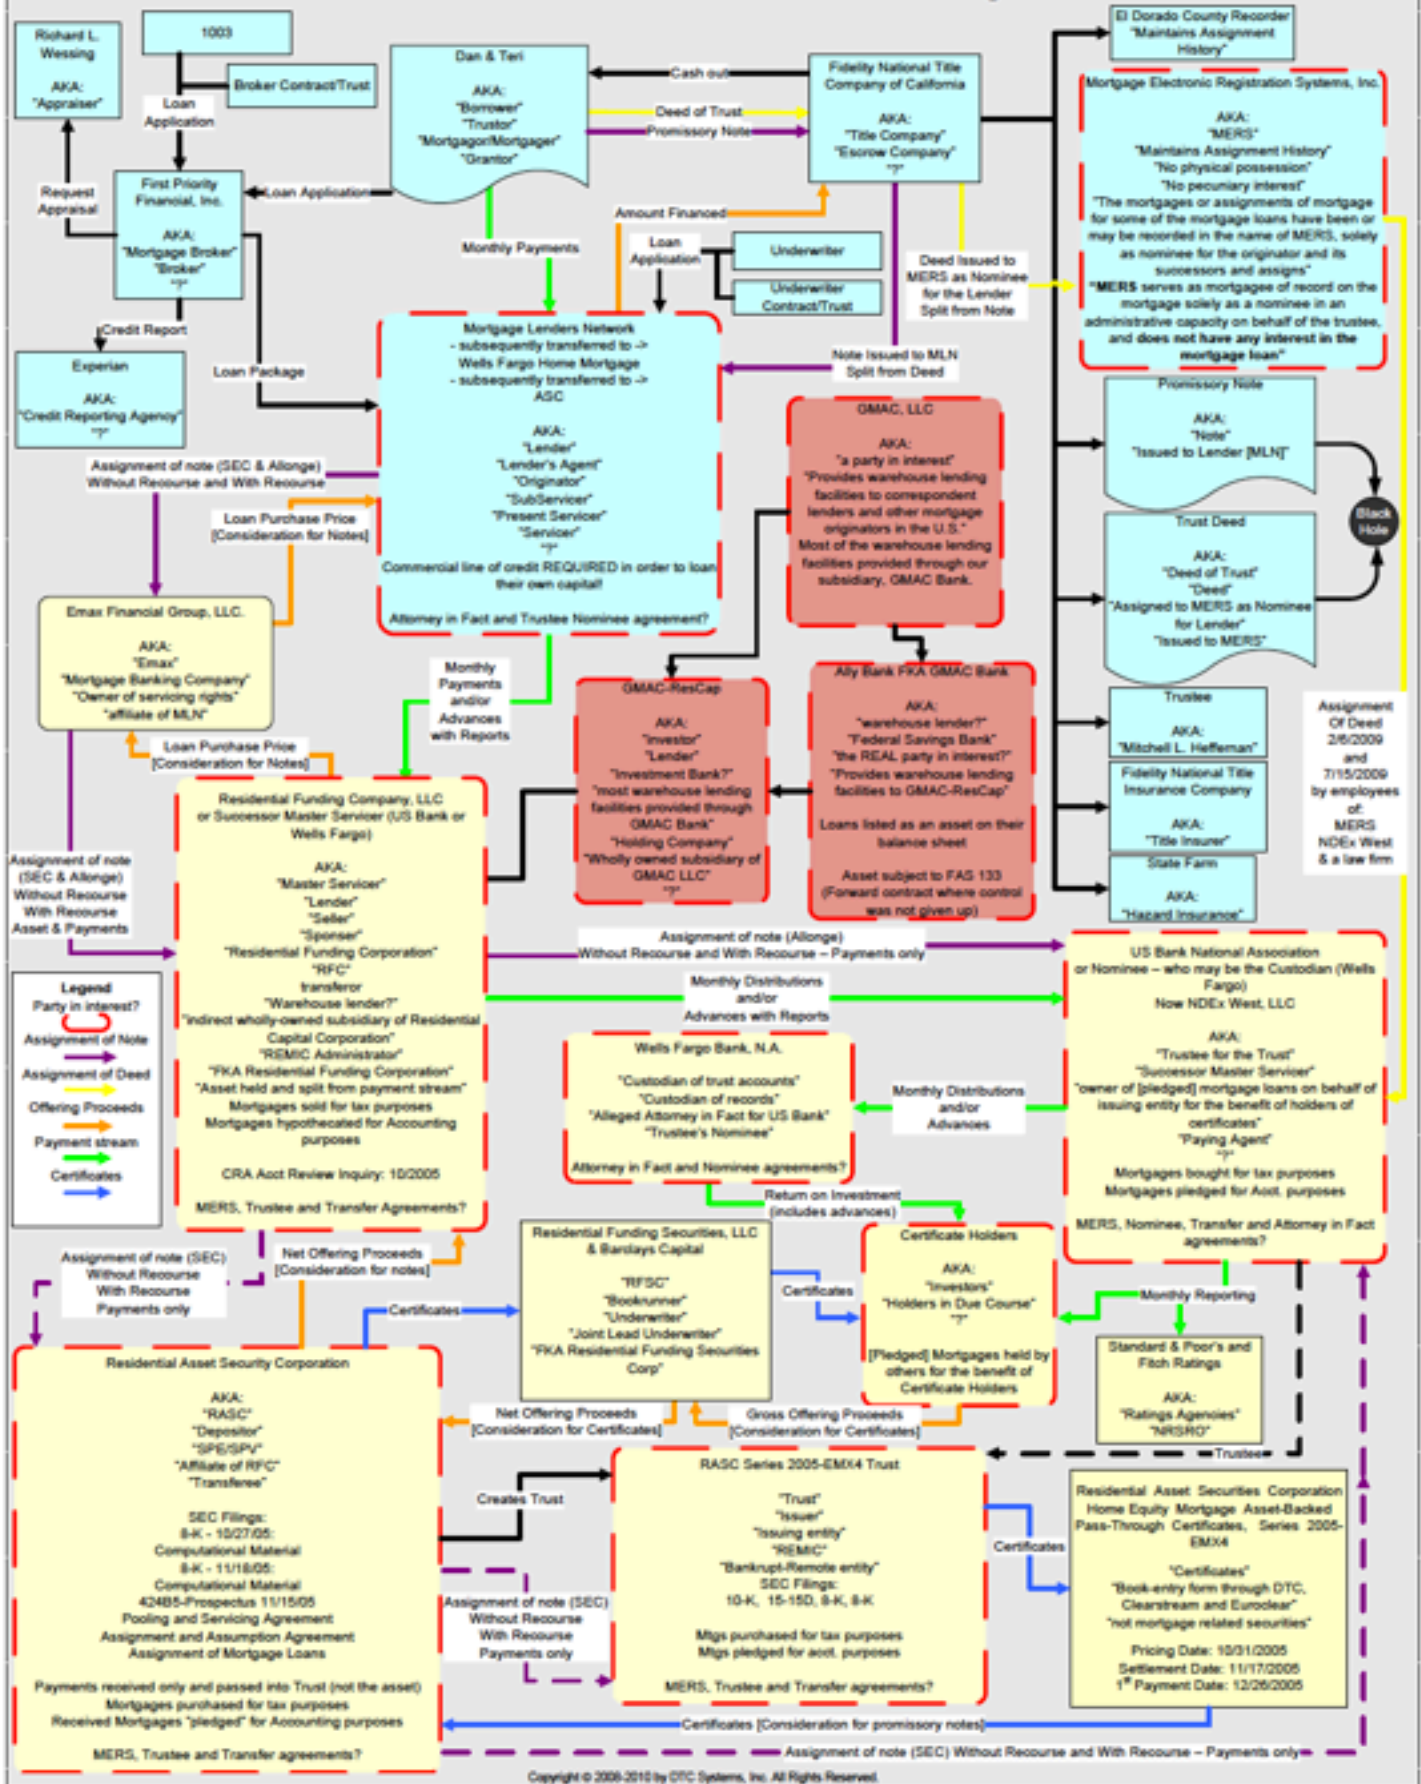

Too much opportunity for wrong-doing

Too much opportunity for fraud

Too much opportunity for theft

Precious metal-backed currency  
prevents governments  
from stealing the wealth of their citizens  
by way of the secret tax  
known as inflation.

## The Names Of The Players

When the game starts out there should be a TREASURY NOTE on the federal government sheet. There should be a FEDERAL RESERVE CHECK sitting on the fed sheet,

- **TREASURY NOTE for \$1,000,000**  
The federal government prints “treasury note” with a decided-upon value on a blank piece of paper with fancy borders. It has no real value whatsoever. It’s just a piece of paper. This is given to the “fed”<sup>1</sup> which calls the piece of paper a

### SECURITY ASSET

In return for receiving the the federal government’s treasury note (now called a Security Asset) the “fed” prints a federal reserve check on yet another valueless blank piece of paper. The “fed” gives this check back to the federal government. This check is now called a

- **FEDERAL RESERVE CHECK**  
There is absolutely **NO MONEY BACKING UP THESE CHECKS!**  
If a private citizen were to write “bad” checks on a bank account with **NO MONEY TO BACK THE CHECKS UP** this would be a serious crime.
- The federal government endorses the “fed’s” check and deposits it in one of the Federal Banks (not the “fed”). The receiving Federal Bank calls this check a
- **A GOVERNMENT DEPOSIT**  
The Federal Bank then uses this “money” to write checks to pay for the good and services the government has purchased. When the government pays for services with federal bank checks, the private companies receiving these checks endorse them and deposits them in their own local private banks accounts. These payments are called
- **COMMERCIAL BANK DEPOSITS**  
By a sleight-of-hand financial “trick,” the local bank re-names these deposits calling them

---

<sup>1</sup> The “fed” is a banking cartel—a private company that is NOT part of the federal government.

- **BANK RESERVES**

Private banks are only required to hold back 10% of the deposits they receive. Putting it another way, they are allowed to “loan” 90% of this fake money to other commercial banks. When Bank A receives \$1,000,000. 90% of that (\$900,000) can be loaned to Bank B.

This is the first step in the absurd game called **Fractional Banking**. Each local bank only has a fraction of the funds they are supposedly holding. If all the citizens withdrew the money the *think* the bank is holding the bank would crash immediately.

- Bank B can loan 90% of that (\$810,000) to Bank C.
- Bank C can loan 90% of that (\$729,000) to Bank D
- Bank D can loan 90% of that (\$656,100) to Bank E
- Bank E can loan 90% of that (\$590,490) to Bank F

On and on it goes with no actual money or securities being involved. All these deposits are using fake (fiat) money that does not exist—money that came out of thin air. Step by step banks create new money out of thin air!

When Bank A, B, C, D or E loans money to its customers for homes, cars, boats, airplanes and everything else, these are simply called bank loans. The “money” they are loaning does not exist, did not exist in the past and will not exist in the future.

---

The only reason this fraud works is because the citizens are willing to engage in a voluntary suspension of disbelief.

---

## How To Play The Game

### NOTE

The “fed” does not GIVE money to the federal government . . .  
It loans the money WITH INTEREST.

Every dollar the federal government takes from the “fed” has an automatic debt attached to it. The federal government is fully expected to pay back the loans AND the interest some day.

The amounts already owed are astronomical.  
They can NEVER be repaid.

The money that the federal government has borrowed and the interest on all that debt is truly staggering. It has impoverished every American from now until the end of time.

The evil banking cartel called the “federal” reserve has turned all Americans into dirt poor serfs who work and slave for the cartel of evil bankers they don’t know and have never met.

Here’s how to play the game steps, step-by-step.

*Start out with a TREASURY NOTE on the federal government page and a FEDERAL RESERVE CHECK on the fed page.*

1. The federal government gives the the fed a worthless piece of paper called a TREASURY NOTE “worth” \$1,000,000. The government says it’s worth one million “dollars,” but it’s just a piece of paper.

*Slide the TREASURY NOTE over onto the fed page.*

2. The fed calls this a Security Asset and creates a worthless piece of paper called a FEDERAL RESERVE CHECK which it gives back to the federal government

*Slide the FEDERAL RESERVE CHECK over onto the federal government page.*

3. The federal government endorses the FEDERAL RESERVE CHECK and deposits it into one of its federal banks (not the fed).

*Slide the FEDERAL RESERVE CHECK over onto the federal bank page*

4. When the federal bank receives the deposit of the endorsed check, the government starts paying its bills using their account at the federal bank. The businesses who are owed money by the government receive their compensation via what are known as
5. GOVERNMENT CHECKS.

Now even though these checks have no monetary backing behind them at all, still no one goes to prison.

The federal bank can deposit deposit fake money into a Commercial Bank A. For the game we will assume that the amount Commercial Bank A receives the full \$1,000,000

*Slide a game piece marked \$1,000,000 onto Commercial Bank A*

6. Commercial Bank A names this deposit using the name BANK RESERVES
7. Now, because Commercial Bank A has “reserves,” it is allowed to loan up to 90% of this money (\$900,000) to Commercial Bank B.

*Slide a \$900,000 game pice onto Bank B*

8. Commercial Bank B renames the deposit from Commercial Bank A “reserves.” Once this is done, Commercial Bank B can loan up to 90% of the nine hundred grand (\$810,000) to Commercial Bank C

*Slide a \$810,000 game piece over onto Bank C*

9. Commercial Bank C is allowed to loan 90% (\$729,000) to Commercial Bank D

At every turn of the fractional banking revolving door, new “money” is created out of thin air.

Fractional banking can go on for up to 28 rounds after which the original \$1,000,000 has become a truly staggering amount of non-existing, imaginary, fake (fiat) money. All this money literally came out of thin air!

Over time, this process steals the wealth from all Americans and gives it to the greedy bankers.

Every American is, essentially,  
a serf who slaves tirelessly  
for the benefit of their owners—  
the evil, corrupt bankers.
