

Goodbye Colorado

Sherman Keene

Piano intro

I flew to Boulder on a Winter's day
A concert show and all my songs to play
The sun was high; the people passing by
And not a one would look me in the eye

All the people that I knew
Were those who came with me when I flew

Guitar solo

I went up to the mountains in the snow
And thought about the people far below
Is it rich families far away
Are sending all their children here to stay

Maybe the people act that way
To keep the city folks away

Goodbye Colorado your mountains get me high
Goodbye Colorado your people try to hide what's inside
Flying in the darkness on a cold Denver night
Thinking of the Boulder street where everyone's uptight
It's all right

Maybe the people act that way
To keep the city folks away

Piano solo

Much time goes by and Winters fade away
But in my head it's only yesterday

I wish when I visit Boulder once again
I could find someone I could call my friend

All the people that I knew
Were those who came with me when I flew

Goodbye Colorado your mountains get me high
Goodbye Colorado your people try to hide what's inside
Flying in the darkness on a cold Denver night
 (backing vocal) goodbye colorado one more time
Thinking of the Boulder street where everyone's uptight
 goodbye colorado going to fly to the other side
It's all right

Goodbye Colorado ooh ooh ooh ooh
